Attachments: ORR EMDF Draft ROD_ORC Cmmts 8-26-21_clean CA annotated.docx

Hi Carl,

I have a different view of this. I want to keep the comments about public involvement – but note that EPA is aware that DOE is planning additional public engagement and that we will review the next draft of the ROD accordingly.

Likewise, the FFS.

The reason is that I think we need these things stated clearly for the record. We don't have much of anything in writing regarding a commitment to additional public comment. And while I want to acknowledge the FFS is currently being revised, I think it is wise to have the specific issues on record. Take a look at my annotated version, attached. See what you think. We can discuss later today.

I still think we can get the comments on the ARARs Table to DOE this week as preliminary/draft, but will have to incorporate the other ORC comments with the larger set of comments (HQ, R4).

Cathy

Subject: RUSH - RUSH - RUSH -- Condensed R4-ORC comments on D1 EMDF ROD
Importance: High

Cathy,

I've read every single one of the 33-pages of comments and have chopped them back according to:

1. The new public comment period – Many of the ORC comments targeted NOT having all of the post Proposed Plan info available to the public for comment. These comments now go away with the new public comment period.
2. FFS/discharge levels – Many of the ORC comments actually say that once the FFS is done and the new numbers are included in the D2 ROD the "issue" goes away.
3. Duplicate comments – there were a LOT(!) of comments that #1 and #2 knock out.
4. ARARs – I did NOT change them.

What is left are the many condensed comments and ARARs.

What I need from you please – Just read through those comments that I didn't strike out and make sure that you agree with keeping them – or delete any/all that you feel need to be deleted.

I'm now going after the EPA HQ comments via the spreadsheet.

Carl
